

# Women+ in Concentrate d Solar

---

# Our motivation

- Renewable energy employs about **32% women**
- All genders bring **different skills and perspectives to the workplace**, including different attitudes to risk and collaboration
- We created this group for women and underrepresented genders working in the sector of concentrated solar technologies, to **support, bring visibility and increase the participation of underrepresented genders** in this sector in a way that includes diverse backgrounds, attitudes, and perspectives.
